

ABSTRACT

[0035] The disclosure describes a triple clamp. The triple clamp includes a body defining a first fork clamp opposite a second fork clamp along a fork centerline. The body defines a center steering pivot. The center steering pivot includes a pivot centerline. An offset is defined by the fork centerline and the pivot centerline. At least one clamp insert has an eccentric form insertable in each of the first fork and the second fork. The clamp insert is configured to shift the offset.
